

### Remarks

The courtesy of an interview afforded applicant's attorney by the Examiner in charge of the instant application is hereby acknowledged with appreciation.

Claim 3 was discussed at the interview wherein it was noted that the newly cited reference to Verdesca 4,270,821, did not disclose applicant's claimed angle iron having a slot 5d in the vertical arm 5b and an enlarged opening 5e in the base portion 5a. Verdesca merely discloses a bracket having a key hole slot for mounting a cabinet on a wall. It is submitted that to combine the teachings of Williams, 5,954,307; Linger, 4,093,327 and Verdesca, 4,270,821, would result in a key hole slot provided in the vertical arm 5b.

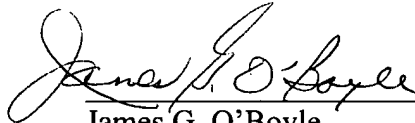

In order to expedite the prosecution and eventual allowance, claim 3 has been further amended to include the limitation of claim 10, which was indicated as allowable. Claim 3 now includes the limitation of the aperture 5g in the vertical arm 5b of the angle iron 5 adapted to receive the hooked end of a tool for lifting the angle iron off the lag screws 9.

Claims 4 and 6, which were indicated as containing allowable subject matter, have been rewritten in independent form.

Accordingly, claims 3, 4 and 6 are now deemed allowable together with dependent claims 5 and 7 to 10.

Respectfully submitted,

April 20, 2006  
Date

  
James G. O'Boyle  
Attorney for Applicant
